

Veda Technology – Excel Formulas & Functions Fundamentals

Completed using the uploaded Sample Superstore dataset

1. Dataset Overview

Item	Value
Rows	9994
Columns	21
Unique Products	1850
Unique Regions	4
Total Sales	2,297,200.86
Total Profit	286,397.02

2. Formula Demonstrations

Function	Purpose	Example
VLOOKUP	Find related product information from a table.	=VLOOKUP("FUR-BO-10001798","Product Master"!A2:D1863,2,FALSE)
XLOOKUP	Perform a flexible exact lookup.	=XLOOKUP("FUR-BO-10001798","Product Master"!A2:A1863,'Product Master'!B2:B1863,"Not Found")
IF	Make a decision based on a condition.	=IF('Sales Data'!R2>50000,"High","Low")
SUMIFS	Add Sales values that meet a condition.	=SUMIFS('Sales Data'!R2:R9995,'Sales Data'!M2:M9995,"West")
COUNTIFS	Count records that meet a condition.	=COUNTIFS('Sales Data'!M2:M9995,"West")
UPPER	Convert text to uppercase.	=UPPER('Sales Data'!G2)
LOWER	Convert text to lowercase.	=LOWER('Sales Data'!G2)
PROPER	Format text with initial capitals.	=PROPER('Sales Data'!G2)
LEN	Count characters in text.	=LEN('Sales Data'!G2)
LEFT	Extract characters from the left.	=LEFT('Sales Data'!B2,3)
RIGHT	Extract characters from the right.	=RIGHT('Sales Data'!B2,3)

3. Edge Case Testing

Test	Expected Result
Missing Product ID: P999	Not Found
Blank Customer Check	Blank or Not Blank
Text vs Number	TRUE when tested value is text

4. Workbook Structure

The final Excel workbook contains four sheets: Sales Data, Product Master, Formula Practice, and Summary. The Formula Practice sheet includes VLOOKUP, XLOOKUP, IF, SUMIFS, COUNTIFS, text functions, edge-case tests, and short usage notes.

5. Submission Checklist

✓ Workbook created from the uploaded Sample Superstore dataset

- ✓ VLOOKUP and XLOOKUP demonstrated
- ✓ IF, SUMIFS and COUNTIFS demonstrated
- ✓ Text functions demonstrated
- ✓ Edge cases tested
- ✓ Short notes included for each formula
- ✓ Excel workbook ready for Veda Technology submission
